Driven developer, areas of expertise include responsive development, UX design, ability to work alone or on a team, and exceptional communication skills, In addition to a work-life, I'm also passionate about learning new technologies, languages, and tools in my off-time. Some things I am currently learning more about: JQuery & Javascript, Node.js, and OOP design patterns.

EXPERIENCE

STUDENT
RefactorU
Boulder CO
March 2015 - June 2015

RefactorU is a 10-week intensive, full-stack Javascript bootcamp. I was in the course from March to June, and l have produced many applications and completed many problem sets as part of my class, and I left class with a final application that I will have conceptualized and built on my own, and that remains something I will continue to improve.

SENIOR FRONT-END DEVELOPER
EvoGov
Denver CO & Remote
September 2014 - March 2015

Front-end development for many different client sites, specializing in the municipalities and cities vertical. -Complete, responsive front-end development, including mobile, of new sites based off Photoshop or Illustrator designs and incorporating with a proprietary CMS. -Front-end support for live sites -- commonly new navigation layouts and implementing contextual navigations on interior pages only. -Small design work, mainly for new buttons or call to action items.

CUSTOM SOFTWARE DEVELOPER
Amadeus Consulting
Boulder CO
February 2014 - June 2014

Front End Development for many different client projects in an agency setting, mainly utilizing HTML5, Sass/CSS3, and Javascript leveraging the Bootstrap framework and a ASP.NET MVC backend. -UI/UX design (color comps, wire-framing, icon creation) for a seamless customer experience. -Rebuilt an entire custom Wordpress site in 2 days in a huge effort to save the company a very lucrative marketing client.

WEB DEVELOPER II
Experian Consumer Direct
Denver CO
November 2013 - November 2014

Solely responsible for the Accelerated Content ticket queue (tickets needing less than 40hrs of work) for a high-volume site utilizing many different site versions and product tiers. This queue was the first to use Agile Scrum in the whole company, and continues to do so with team members based in Los Angeles and in the UK. Some examples of ticket work are: Site-wide logo changes, site-version specific landing page redesigns, and fixing numerous cross-browser rendering issues.

FREELANCE WEB DEVELOPER
Self-Employed
Los Angeles CA
2012 - 2013

First experience with web development -- mainly creating sites for friends and also some paying jobs. Great experience getting my feet wet in the industry and deciding it was what I really loved. Basic creation of sites, generally for photo galleries and incorporating a custom-skinned Wordpress blog to match the rest of the site.
